

High-Quality Research Reagents Since 1987

Meet your plasma protein needs with our off-the-shelf products or speak with our experts about creating a custom solution backed by our 35 years of hands-on experience.

Coagulation Proteins

We lead the industry in specialized proteins involved in regulating blood coagulation and fibrinolysis, as well as bone metabolism. Select from more than 150 highly purified, well-characterized native proteins, including zymogens, enzymes, cofactors, and inhibitors from human, bovine, and murine source plasma (other species by request).

Substrates & Inhibitors

Prolytix is your source for a complete line of ANSN-based substrates for monitoring enzyme activity of serine proteases, as well as tri-peptide chloromethylketones to irreversibly inhibit these proteases. You'll also find a variety of other plasma and non-plasma inhibitors.

Custom Purification & Modification

Need research reagents not in our catalog or modifications to listed products, such as buffer reformulation or conjugation? Enjoy our unrivaled customization services supported by some of the industry's top research scientists, who partner with you to provide the protein you need, fully characterized to your specifications.

IVD & Point-of-Care Reagents

Prolytix also provides customized reagents for IVDs and POC devices, such as antibodies for ELISAs and on-board control chemistries for hand-held coagulation monitoring devices. We help get your product to market with more than 35 years of blood coagulation experience and close consultation on the design of your assay or device, reagent and control options, manufacturing validation, and ongoing support throughout your product's life cycle.

Why Prolytix?

- > 150+ native plasma & tissue proteins
- > Active involvement in the evolution of plasma fractionation
- > 35 years of blood coagulation experience
- > Hands-on customization & consultation
- > >95% pure & fully functional
- > Multi-species, active, site-blocked, & conjugated versions
- > Protein purification expertise

Need a Custom Solution?

Whether you know exactly what you need or have no idea where to start, we're happy to help you. Contact us for customization and modification needs, personalized solutions, and information on getting the most out of your plasma proteins. We pride ourselves on unparalleled partner support.
