

How Much Does Project Management Matter When Choosing a CRO for Your Biotherapeutic Program? A Lot.

At Prolytix, we understand that expert project management is essential to ensure our client's needs are fully supported from the first call to completion. Transparency and close communication are crucial for building strong relationships that enable us to overcome your obstacles as teammates that share your singular vision. That's why we don't just talk about project management — we've built an entire team around offering you this level of customized support. We call this tailored project management PROPath, and we are dedicated to providing our customers with end-to-end project management that delivers the data you need on time and on budget. With our custom approach to project management, we aim to remove the risks to our client's project success. Go with the pro — Prolytix.

What makes our project management special?

You may have worked with other CROs and settled for their bland project management style, but when you work with Prolytix you'll quickly learn firsthand that we just take better care of you, plain and simple. We listen closely to understand your challenges and requirements and deliver exceptional quality in all regards.

Proactive flexibility is one of our core strengths, and we openly assess progress and risks throughout the project to adaptively ensure your objectives are met.

- > Crystal-clear deadlines
- > Rapid, informed decisions
- > Efficient reporting structure
- > Optimal resource allocation
- > Advanced software tools
- > Finely tuned processes

We Keep You in the Know With PROPath

When you partner with Prolytix, we become part of your team, we provide you with a certified project manager, and you communicate directly with the scientists doing the work. These are the hallmark traits of PROPath!

Expect Project Management Excellence: We've Got the Record to Prove It

In a recent example, we helped a client who needed assay data on a short timeline for a critical meeting:

- > We worked through challenges with kits and assays

- > We stayed in close contact throughout the project

- > Our team went above and beyond, working over the weekend to deliver

The result?

We delivered our client's data **a day ahead of schedule**. That's the level of commitment, quality, and determination we bring to every project we undertake.

When we discover a threat or an opportunity, we work with you to find the right solution and best next step. How do we ensure this level of excellence?

› Providing a Personalized Approach

We don't follow a traditional project track. With maximum agility and flexibility, we can assess project feasibility before development or support you in completing or changing the scope of work to guarantee you receive the right solution — even if you've hit roadblocks with other CROs.

› Going Above and Beyond

We put science first. With 35+ years of experience, we have the analytical and bioanalytical services expertise to design and execute the appropriate tests at the highest quality, delivering detailed data outputs for confident decisions.

› Seeing the Big Picture

We take a holistic approach. Client management and project management work hand in hand to build a time frame that works for you, allocating the time and resources to ensure your milestones are met. We track portfolio progress internally so that each client's deliverables arrive on schedule.

› It's in Our DNA

We hold ourselves to a higher standard. Our recent perfect score on an ISO 9000 audit is just one demonstration of our commitment to having the right systems in place to deliver at the highest standard of quality.

Choose a CRO Partner With the Project Management Expertise to Meet Your Goals

When you need to meet or beat your timeline without sacrificing quality, you need a CRO who puts you first — one that delivers at a higher level to simultaneously accelerate and de-risk your biotherapeutic program. You need a pro.

**Choose a project management partner that will prioritize your project as much as you do.
